Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

TABLE OF CONTENTS

VOLUME 10 1909

PAGES

BIRKHOFF, GEORGE D., of Princeton, N. J. Existence and oscillation theorem for a certain boundary value problem. 259

———— Singular points of ordinary linear differential equations. . 436

BÔCHER, MAXIME, of Cambridge, Mass. On the regions of convergence of power-series which represent two-dimensional harmonic functions. 271

DENTON, WILLIAM WELLS, of Urbana, Ill. On the osculating quartic of a plane curve 297

DICKSON, LEONARD EUGENE, of Chicago, Ill. Definite forms in a finite field 109

———— General theory of modular invariants. 123

———— Equivalence of pairs of bilinear or quadratic forms under rational transformation 347

FITE, WILLIAM BENJAMIN, of Ithaca, N. Y. Irreducible homogeneous linear groups in an arbitrary domain. 315

FORD, WALTER B., of Ann Arbor, Mich. On the integration of the homogeneous linear difference equation of second order. 319

HARTWELL, GEORGE WILBUR, of Lawrence, Kans. Plane fields of force whose trajectories are invariant under a projective group 220

HUTCHINSON, J. I., of Ithaca, N. Y. The hypergeometric functions of N variables 61

JACKSON, DUNHAM, of Cambridge, Mass. Resolution into involutory substitutions of the transformations of a non-singular bilinear form into itself 479

KASNER, EDWARD, of New York, N. Y. Natural families of trajectories: conservative fields of force. 201

LANDRY, AUBREY E., of Washington, D. C. A geometrical application of binary syzygies 95

LEIB, DAVID D., of Baltimore, Md. On a complete system of invariants of two triangles 361

MANNING, W. A., of Stanford University, Cal. On the order of primitive groups. 247

MILLER, G. A., of Urbana, Ill. The central of a group. 50

———— Automorphisms of order two 471

MOORE, CHARLES N., of Cincinnati, Ohio. The summability of the developments in Bessel functions, with applications. 391

OSGOOD, WILLIAM F., of Cambridge, Mass. On Cantor's theorem concerning the coefficients of a convergent trigonometric series, with generalizations. 337
REED, FRANK WALKER, of Urbana, Ill. On singular points in the approximate development of the perturbative function. 485
SCHUR, I., of Berlin, Germany. Beiträge zur Theorie der Gruppen linearer homogener Substitutionen. 159
SCHWEITZER, ARTHUR RICHARD, of Chicago, Ill. Note on a system of axioms for geometry. 309
SNYDER, VIRGIL, of Ithaca, N. Y. Surfaces derived from the cubic variety having nine double points in four-dimensional space. 71
STUDY, EDUARD, of Bonn, Germany. Zur Differential-geometrie der analytischen Curven 1
WILCZYNSKI, E. J., of Urbana, Ill. Projective differential geometry of curved surfaces (fourth memoir) 176
———— ———— ———— (fifth memoir) 279
YOUNG, ARCHER E., of Oxford, Ohio. On a certain class of isothermic surfaces 79
Notes and errata: volumes 8 and 10. 510
